

A photograph of a car's engine compartment with the hood open. The image is overlaid with a large, semi-transparent purple circle on the left side and a large, semi-transparent orange circle on the right side. The text 'CAR STARTER BATTERY TYPES' is written vertically in white, bold, sans-serif capital letters across the purple circle. The text 'MAD POWER' is written diagonally in a large, grey, sans-serif font across the orange circle.

CAR STARTER BATTERY TYPES

MAD POWER

Car Starter Lithium Battery Packs

Features:

- Economize the use of gasoline
- Environmentally friendly
- Longer lifetime
- Light weight
- Stable discharge voltage
- Reduce noise
- Strong starting power under cold weather

Voltage	12V	12V	12V
Rate	48Ah	36Ah	36Ah
Dimensions (mm)	230 (L) x 171 (W) x 199 (H)	230 (L) x 171 (W) x 199 (H)	222 (L) x 115 (W) x 183 (H)

Lithium battery cells are assembled and housed by a battery holder.

The battery pack is contained in a strong outer casing, as the second layer protection.

With build-in protection circuit to avoid over-charge, over-discharge, over-current, and over-heat of the battery pack.
